1. App Concept

For people who have difficulty
expressing wishes, feelings, and needs.

1) Who It Is For

Talking with people from other countries
Language learning
Noisy places where speech is hard to hear
Places where voice conversation is difficult
People with hearing loss
People with aphasia or speech difficulty

2) Why It Was Created

To help prevent isolation caused by
communication difficulties.
Bridgy was created to help connect people.

The name “Bridgy” means building a bridge.

3) Recommended Devices

iPad v18+ / Apple Pencil recommended
iPhone v.18+ / stylus pen
Use iPhone in landscape mode.
Note: the iPhone display area is smaller.

4) Privacy and Ads

Works offline.
You can use it without an internet connection.
Translation also works offline.
The developer does not collect on-screen input. No ads.

2. Basic Use

1) Screen Layout

The screen is divided into upper and lower areas.
Bottom: area for the person operating the app.

Top: area shown to the other person.
Text and lines are rotated 180 degrees.
The other person can also write on the top screen.

2) Ways to Show Text

① Handwriting (finger): write words or draw pictures.

Draw lines with your finger or Apple Pencil.
You can write directly on the board.

② Microphone: spoken words can be converted to text.

③. Keyboard / Apple Pencil

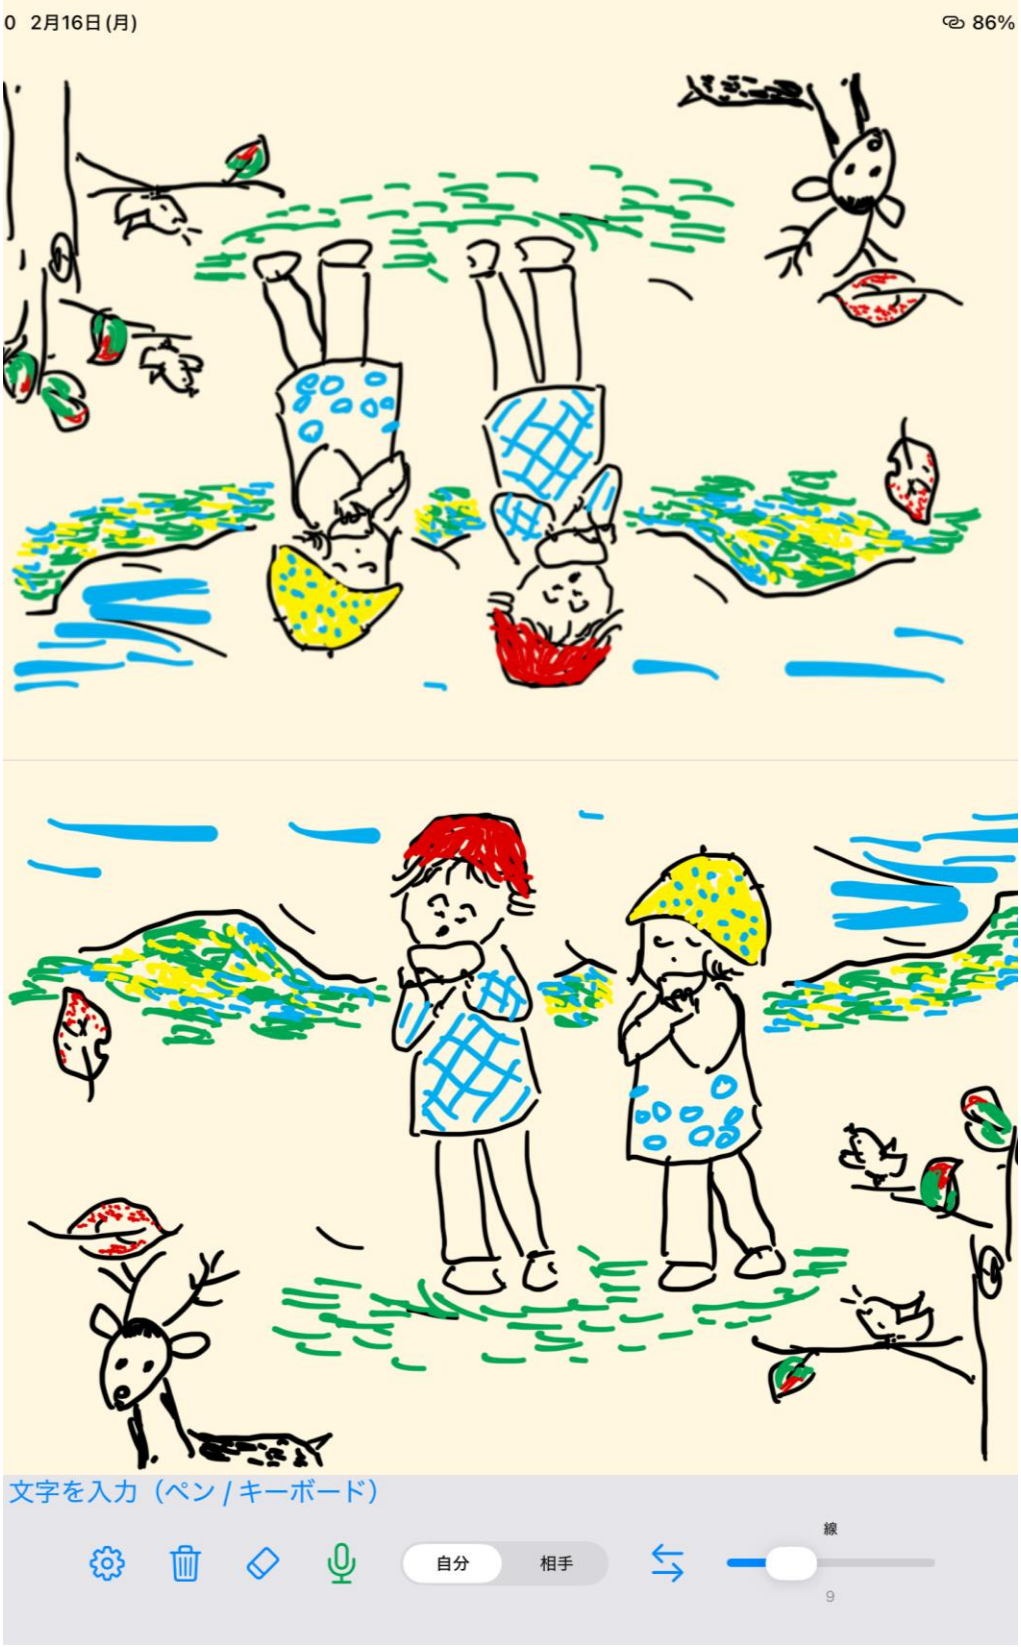
Keybord apple pencil enter text on screen.

Note: Apple Pencil is not available on iPhone.

3. Examples on Screen

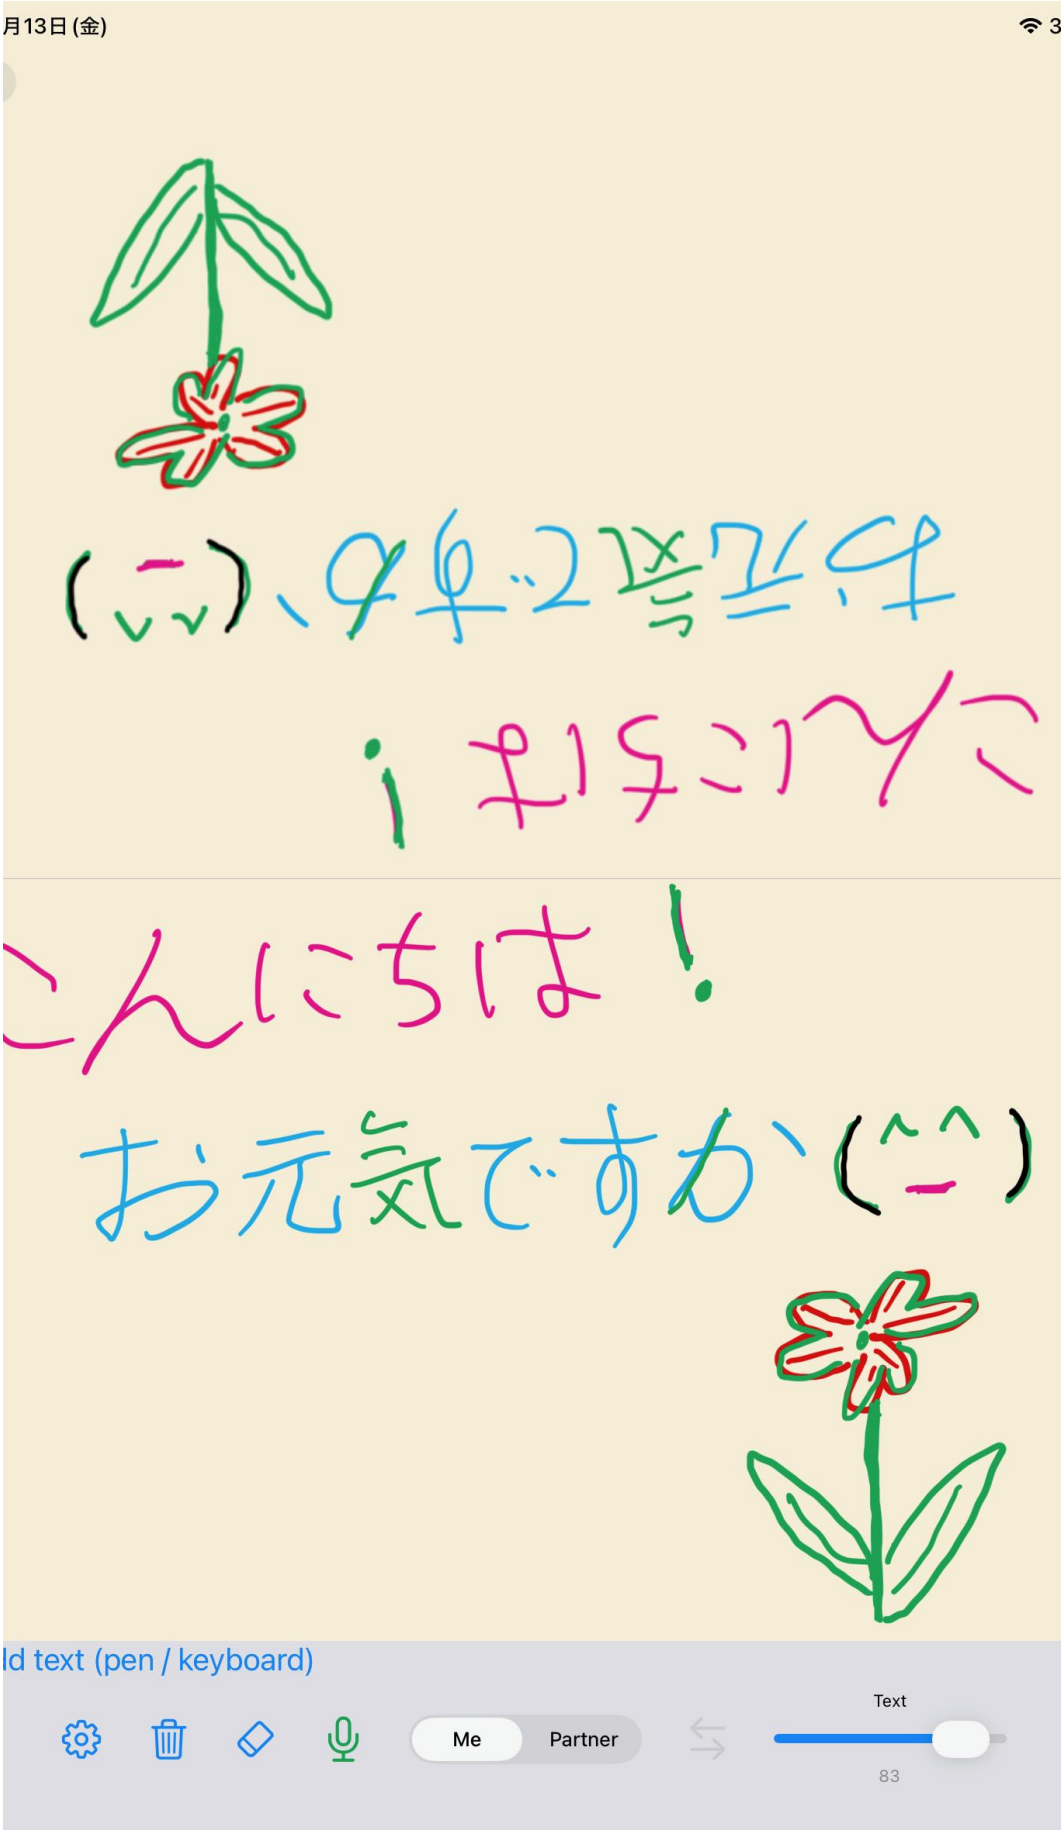
1) Draw words, pictures, or lines by finger or pen. They appear rotated 180 degrees for the other person.

You can write on the screen with your finger or pen.



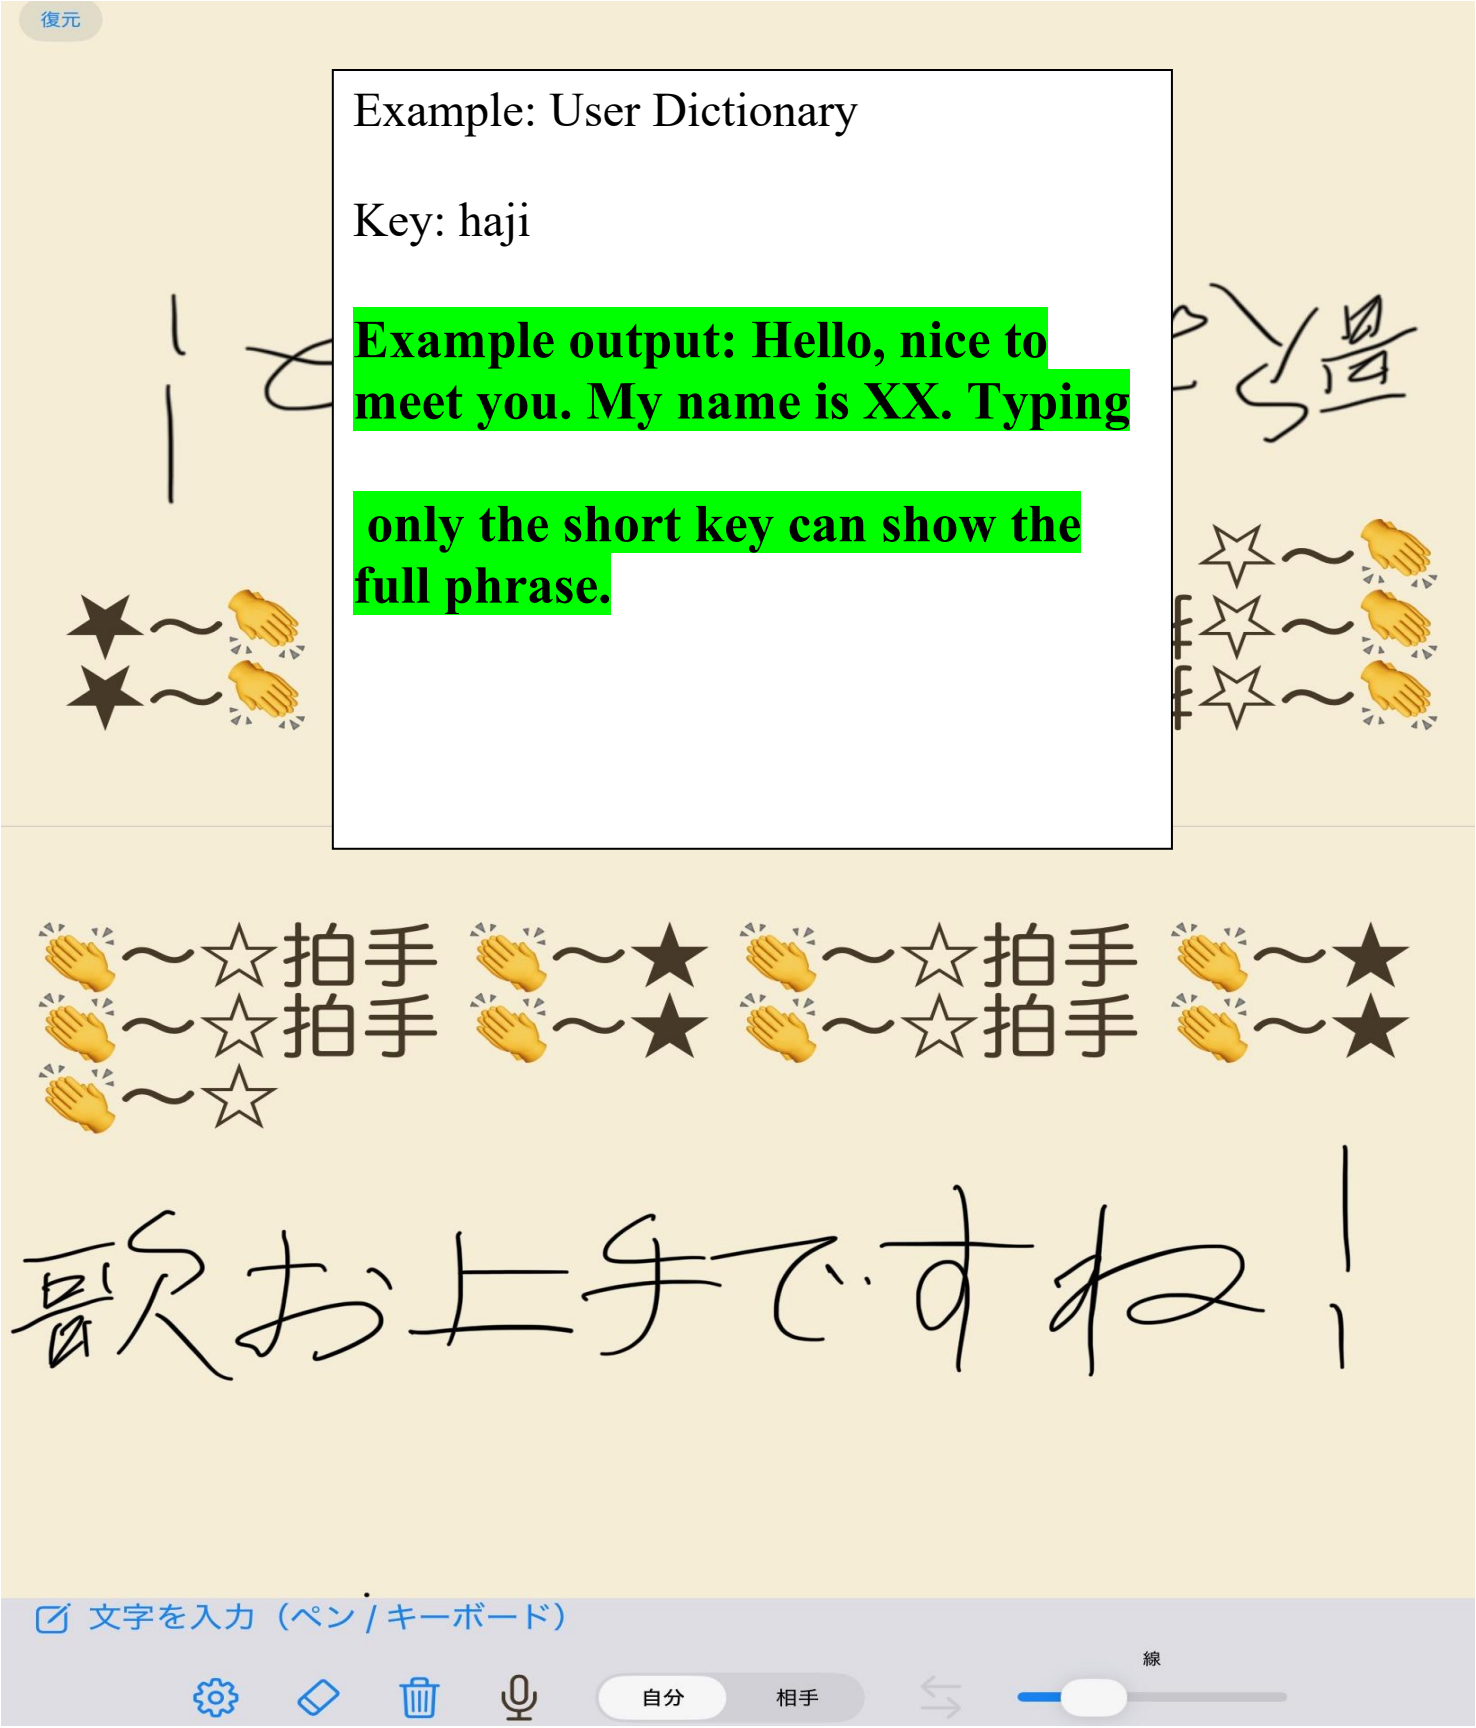
2) Line Drawing Example

You can express ideas by writing or drawing with your finger or pen.



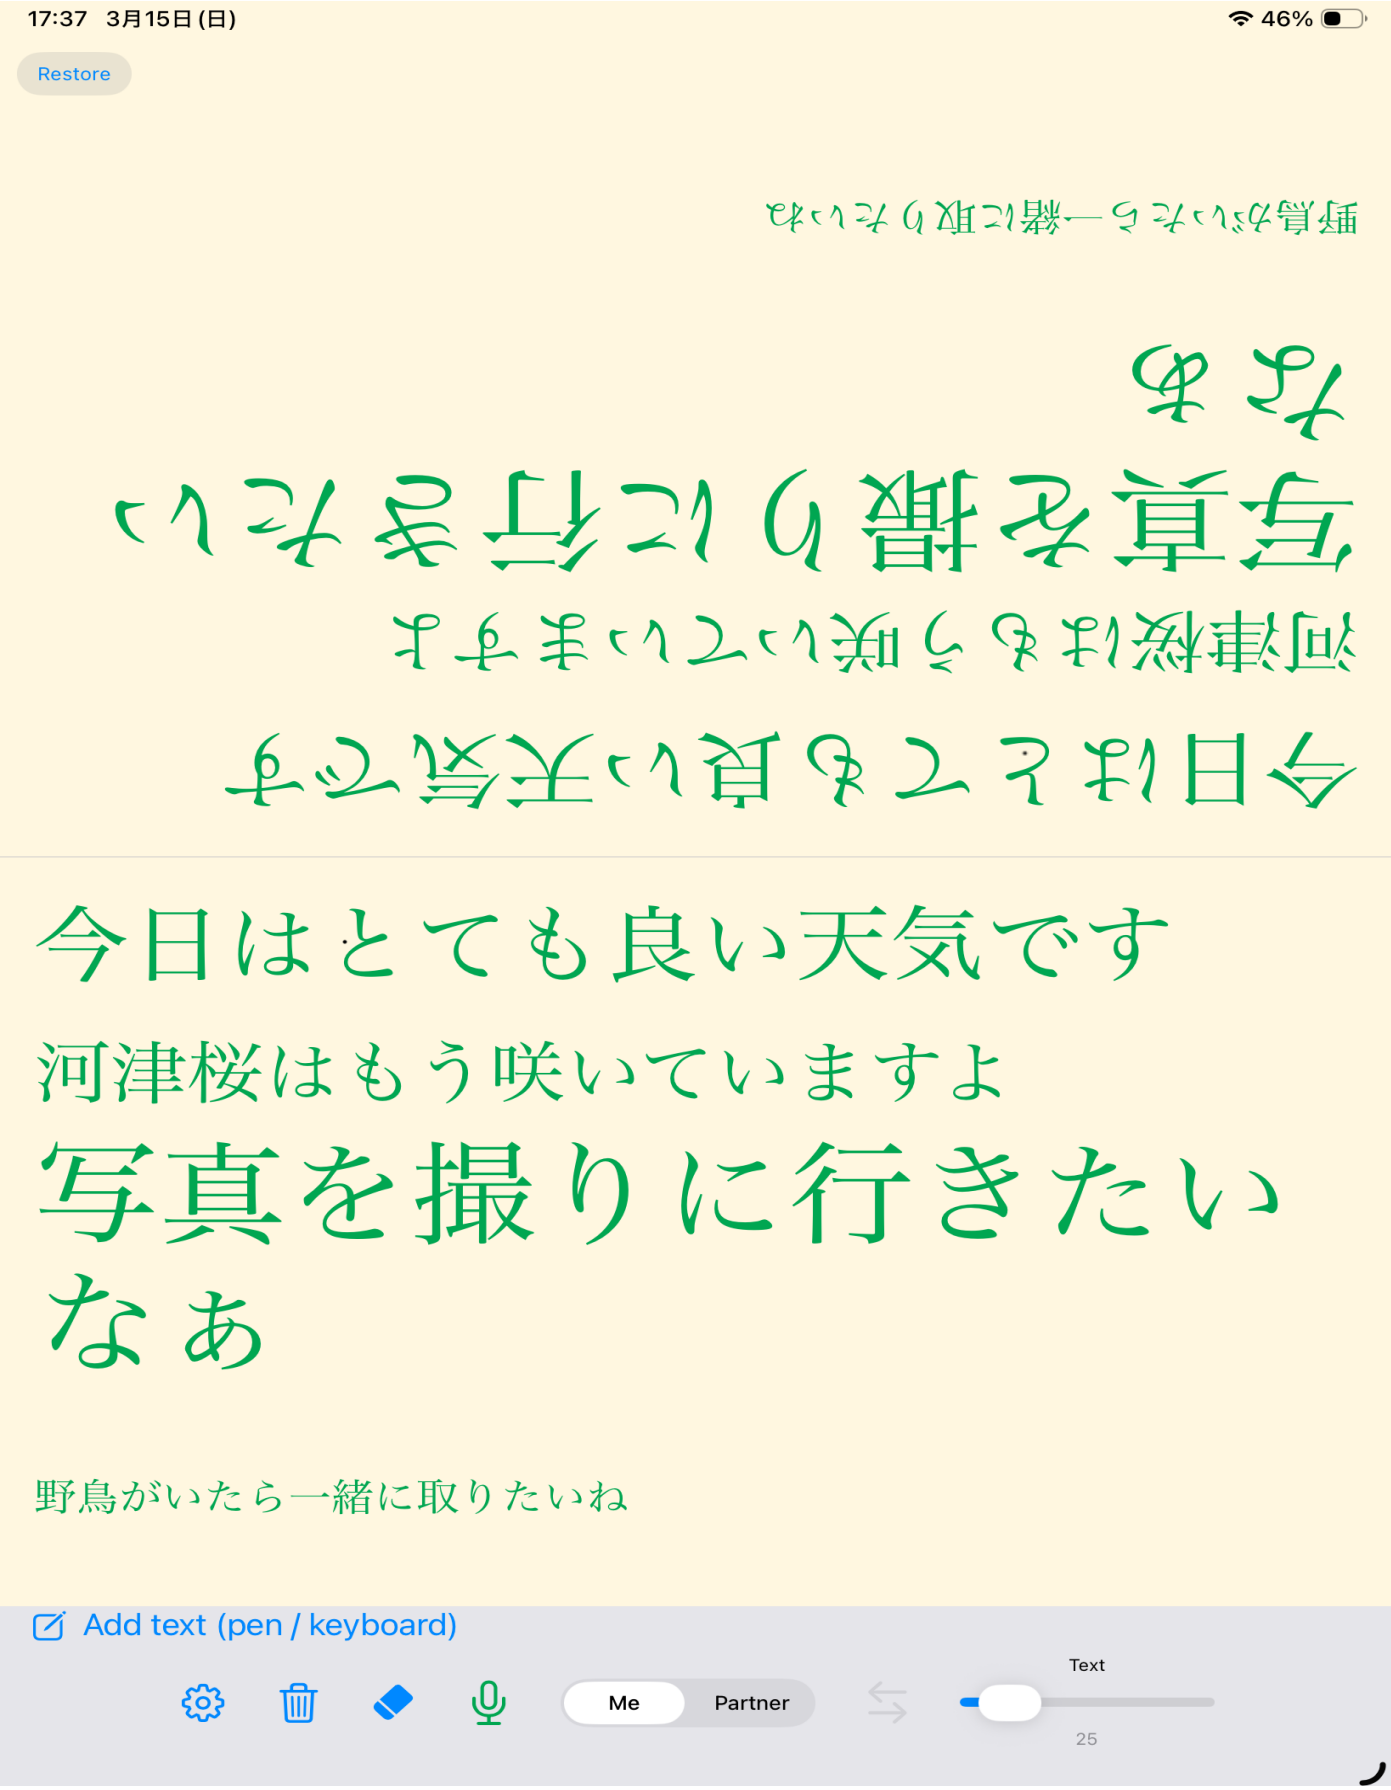
3) Benefits of Keyboard Input

If you register items in the user dictionary in advance, you can quickly display common phrases and emoji with short input.



4) Move text: tap with one finger and drag it.

Enlarge text: spread two fingers apart.



5) Speech to Text

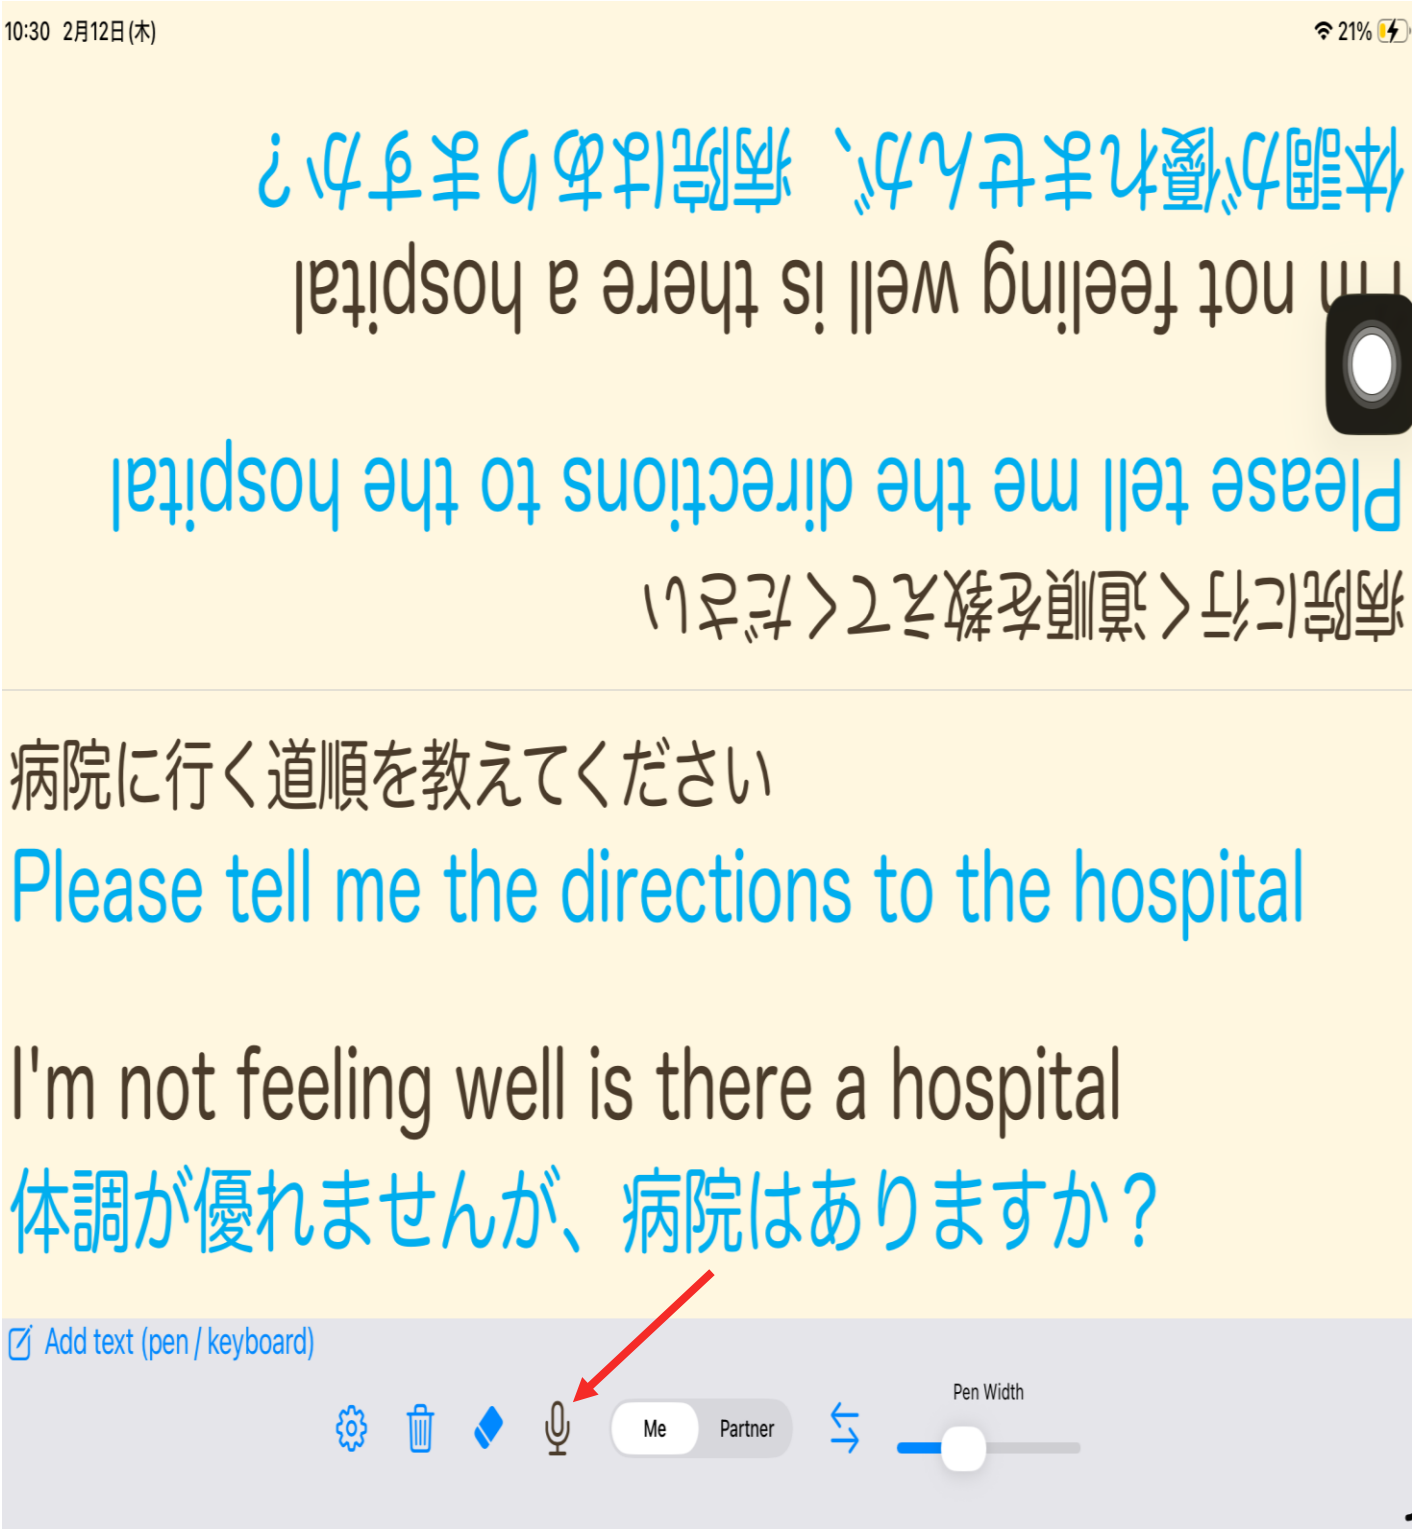
① Tap the mic button at the bottom.

Speech is converted to text.

This helps you communicate many words quickly.

Supports multiple languages, such as English and French.

② Tap the mic again to stop recording and show the text on screen.



6) Keyboard / Apple Pencil Input

① Tap Enter Text (text / pen) at the lower right.

The text input screen opens.

Write in the white area with Apple Pencil, then tap Add.

② For keyboard input, tap the white area.

The keyboard appears.

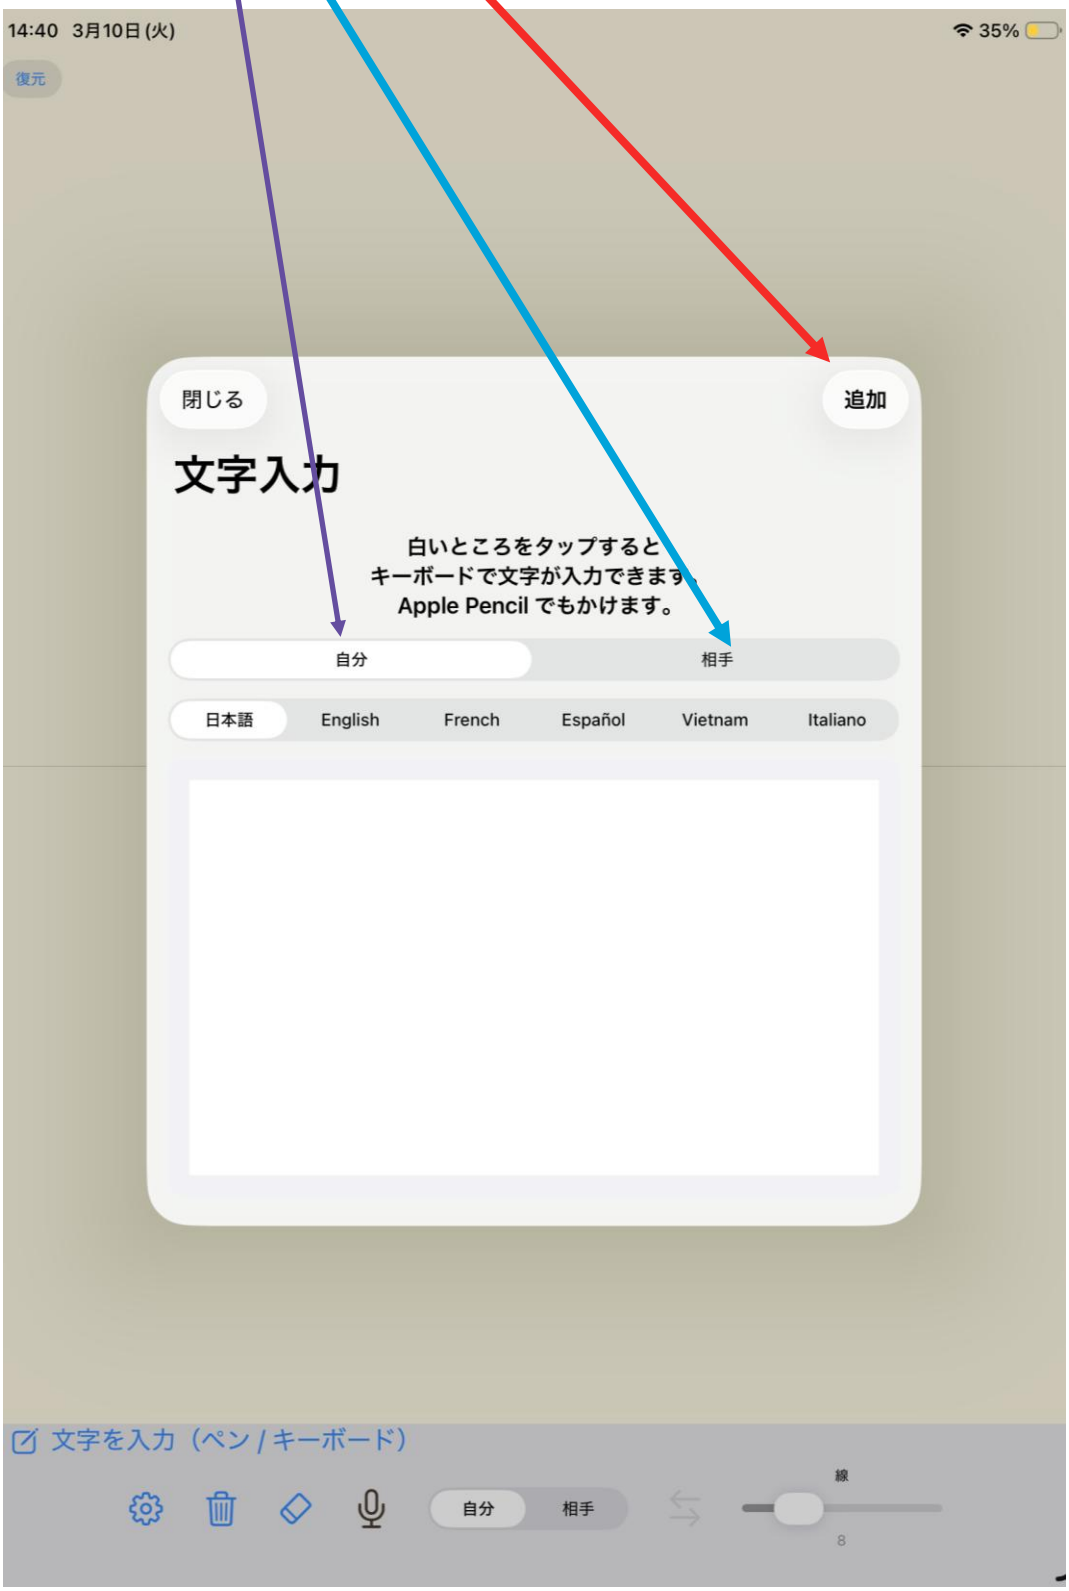
Enter text and tap Add.

Large text appears on both boards.

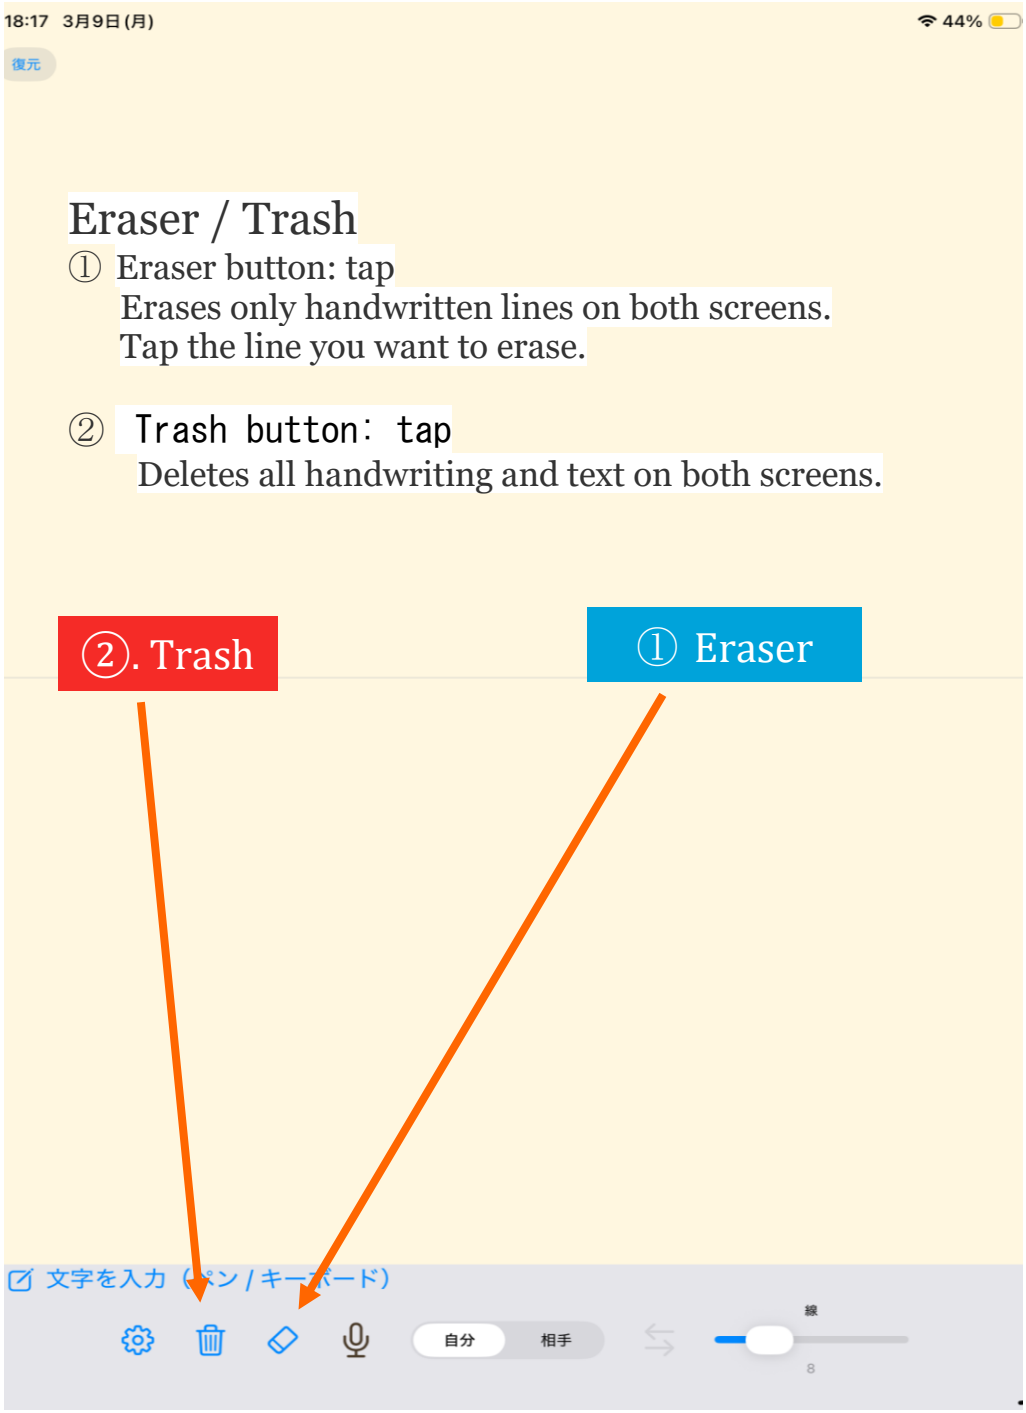
Saved phrases can be shown instantly with short input.

7) Keyboard Input

Tap the white area to show the keyboard.
Select Me.
Select your language.
Select Partner.
Select the partner language.
After typing, tap Add.



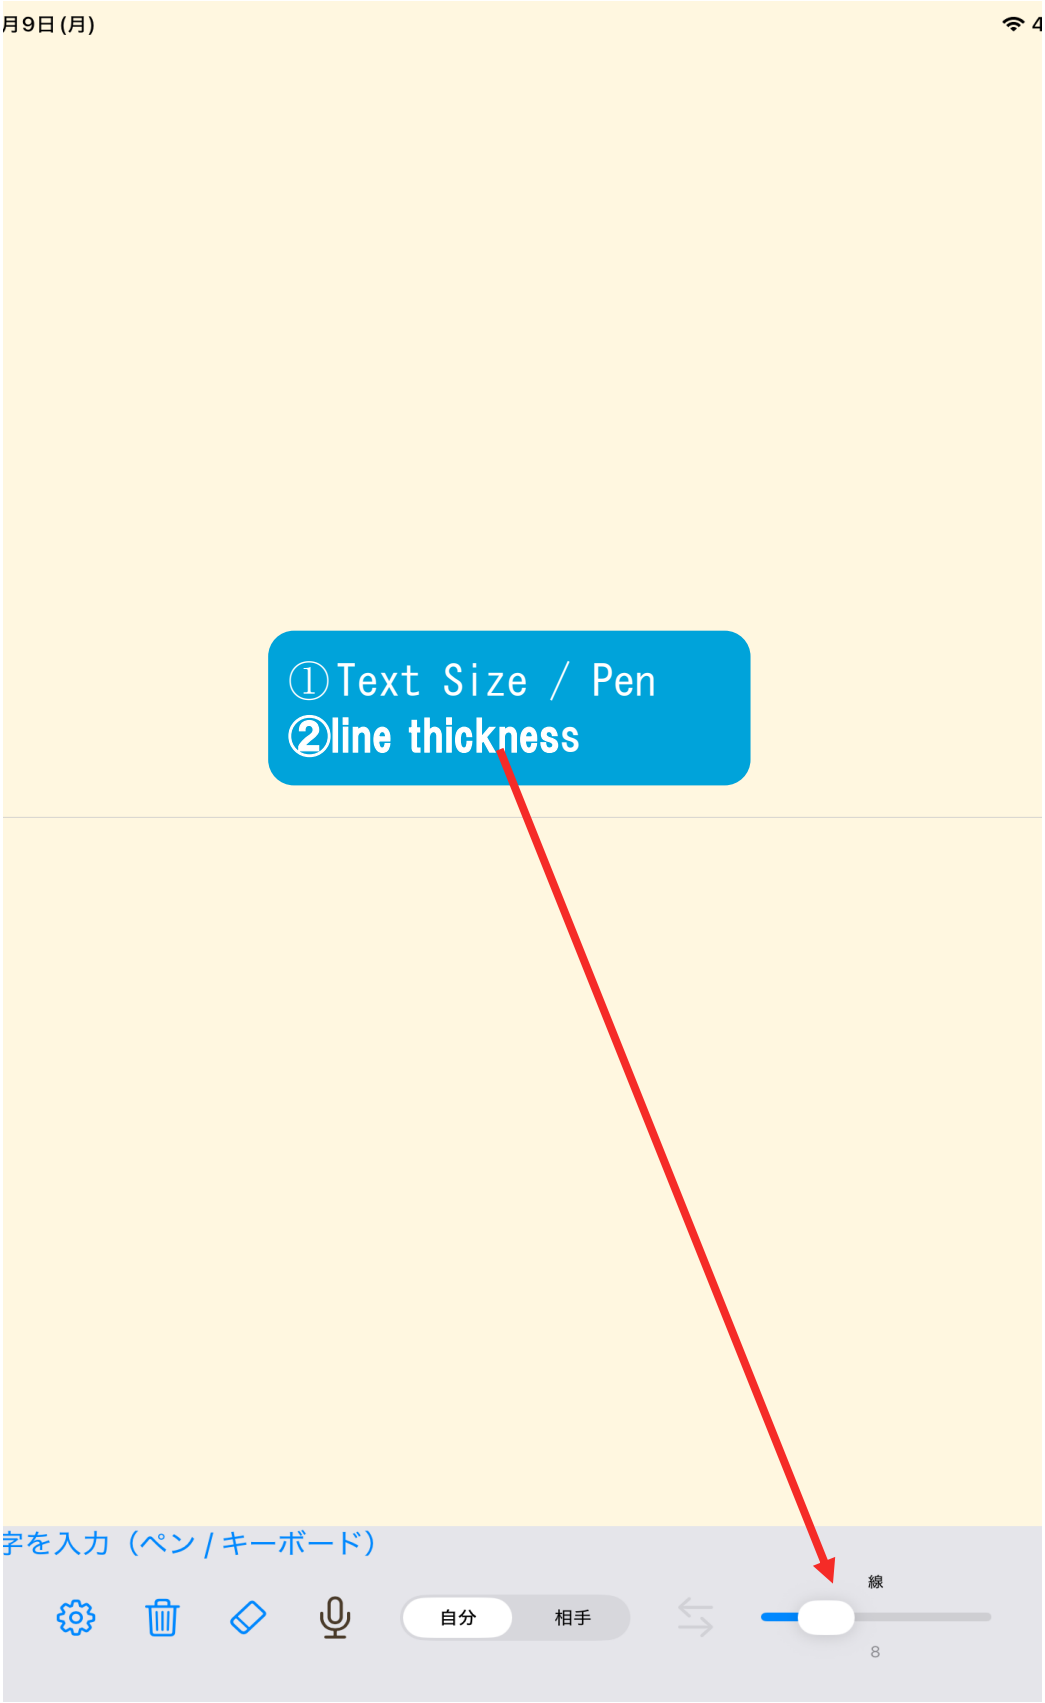
8) Trash and Eraser



9) Text Size / Pen Width

① Move the slider left or right to change text size.

②You can change the line thickness by tapping the slider bar.



10) Purchase Button

You can buy before the 10-day trial ends.

Tap Purchase to buy.

3. Settings Tap the gear icon at the bottom.

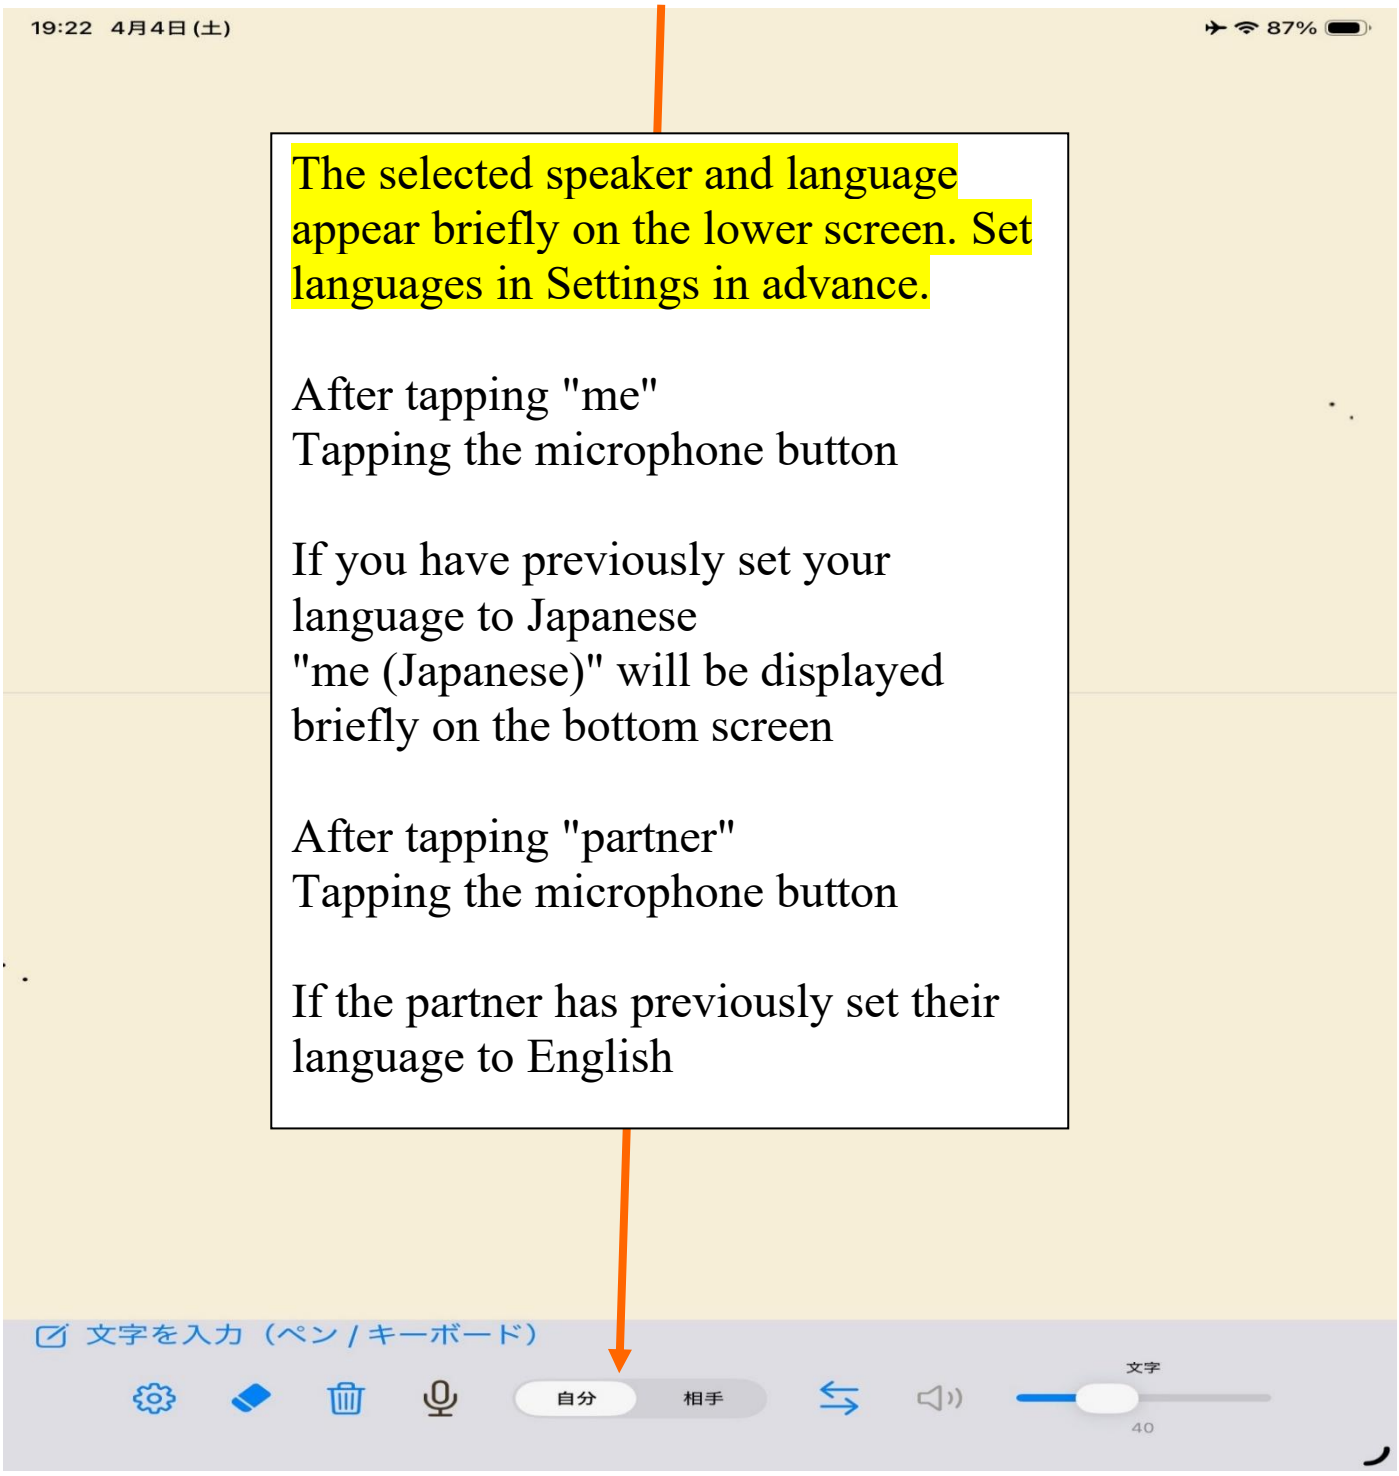
6) Help Restore Purchase: reinstall without being charged again after device loss or replacement.

4. Speaker Selection

1) Mic Speaker Selection

①Me: tap when you speak.

② Partner: tap when the other person speaks.



The selected speaker and language appear briefly on the lower screen. Set languages in Settings in advance.

After tapping "me"
Tapping the microphone button

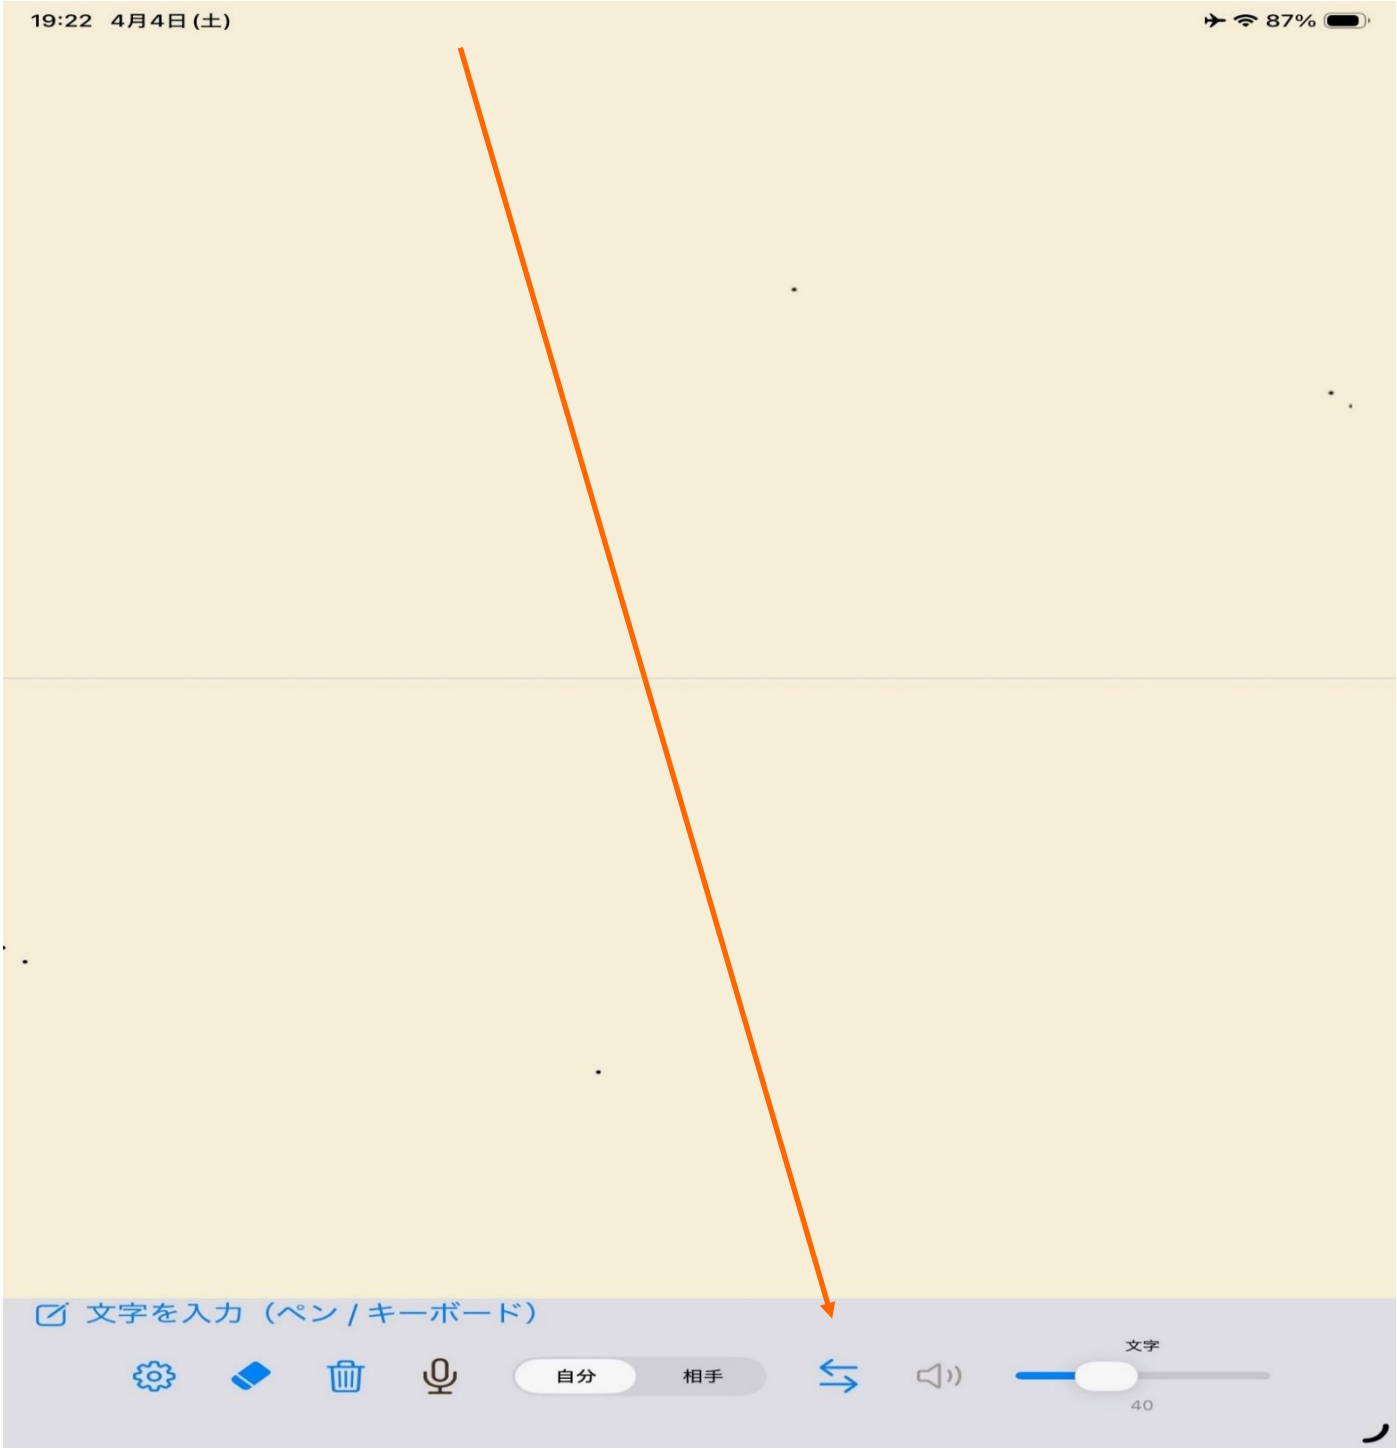
If you have previously set your language to Japanese
"me (Japanese)" will be displayed briefly on the bottom screen

After tapping "partner"
Tapping the microphone button

If the partner has previously set their language to English

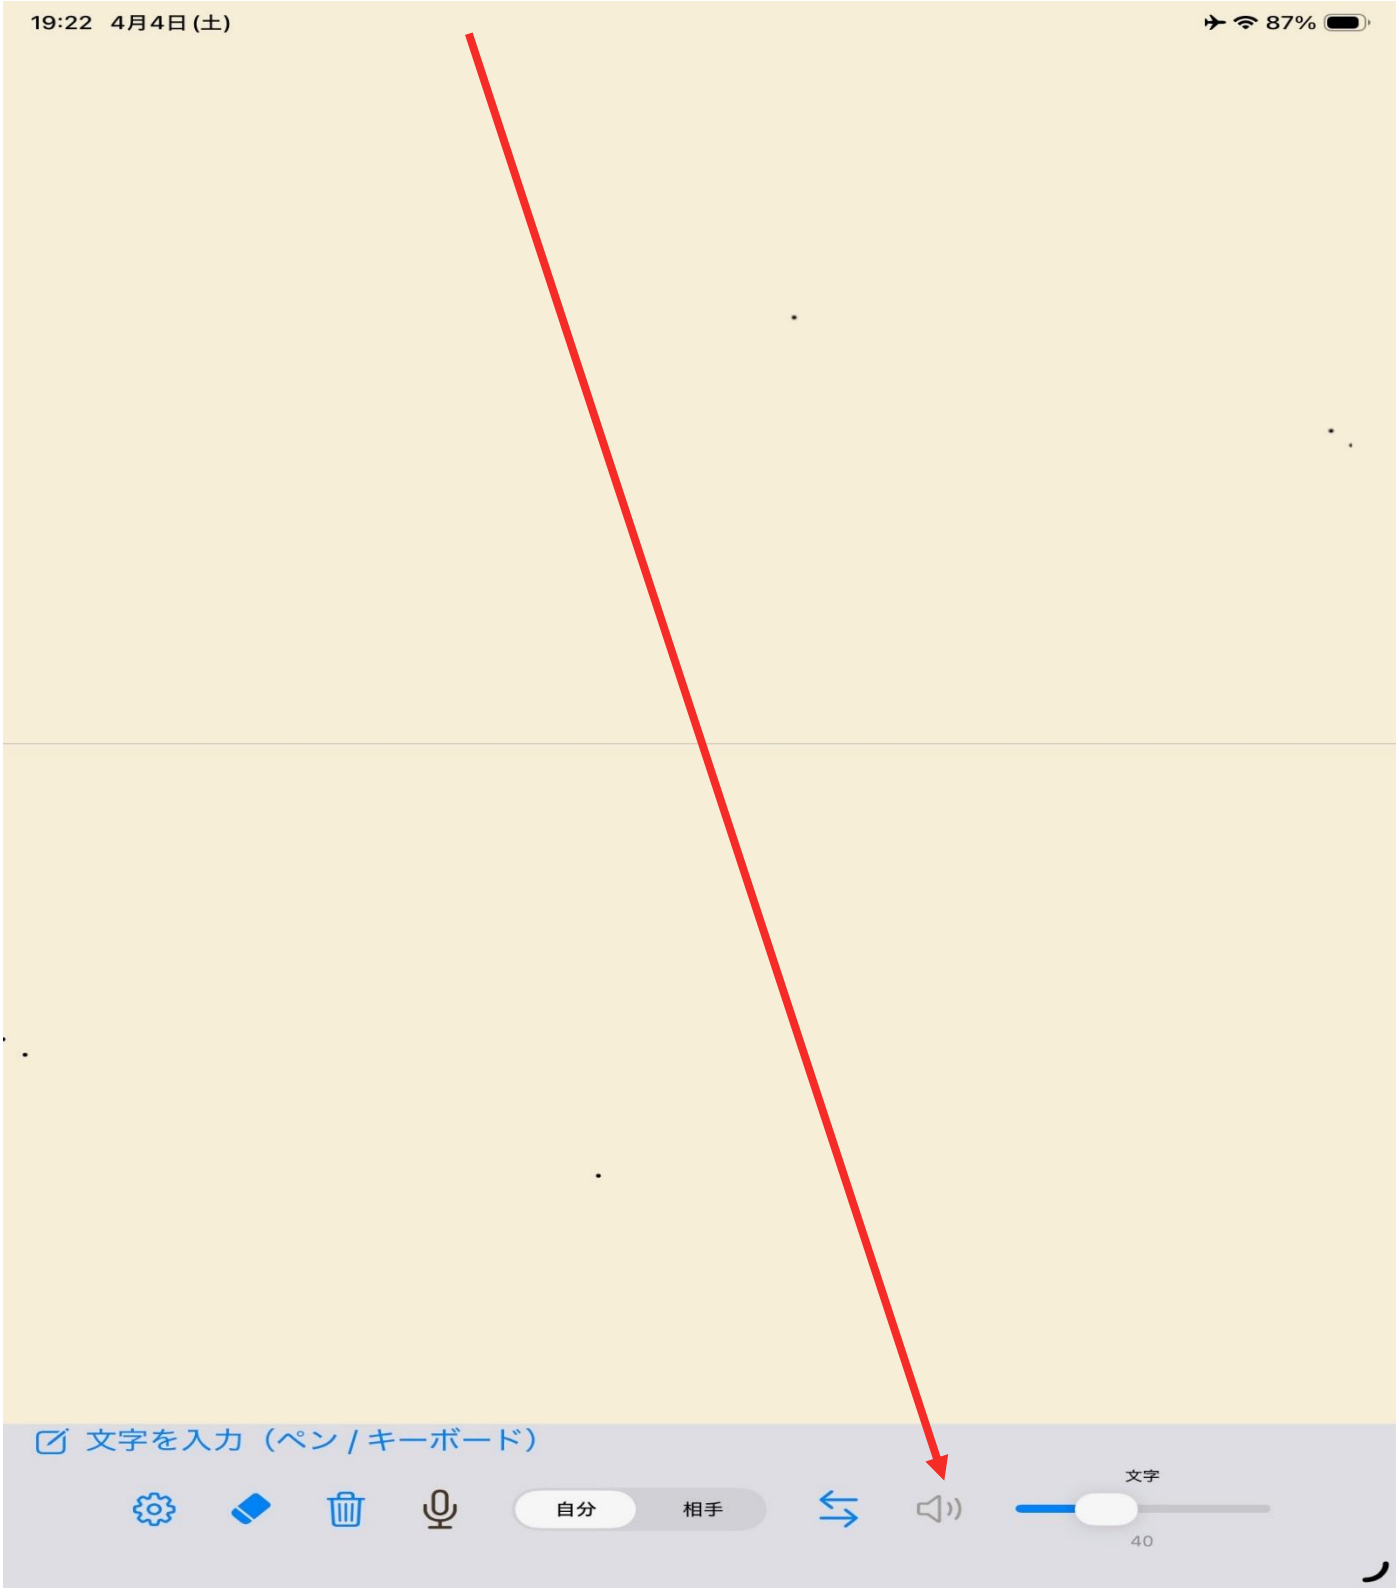
2) Manual Translate Button

In Manual mode, tap to translate the text on screen



3) Tap after the translated text is displayed.

Tap the speaker icon to have the translated text read aloud.



5. How to Translate

1) Before You Start

These settings are required:

① Settings -> Language tab -> Conversation (speech recognition) -> select Me / Partner languages
② Settings -> Language tab -> Translation mode -> choose Manual or Auto after recording

2) Start Translation

③ Select the speaker: Me or Partner.
④ Tap Mic -> speak -> tap Mic again -> speech becomes text.
⑤ In Auto mode, the translation appears automatically.
⑥ In Manual mode, check the text, then tap Translate.

③) Speak Translation

⑦ Tap the speaker icon to read the translated text.

Translation Flow

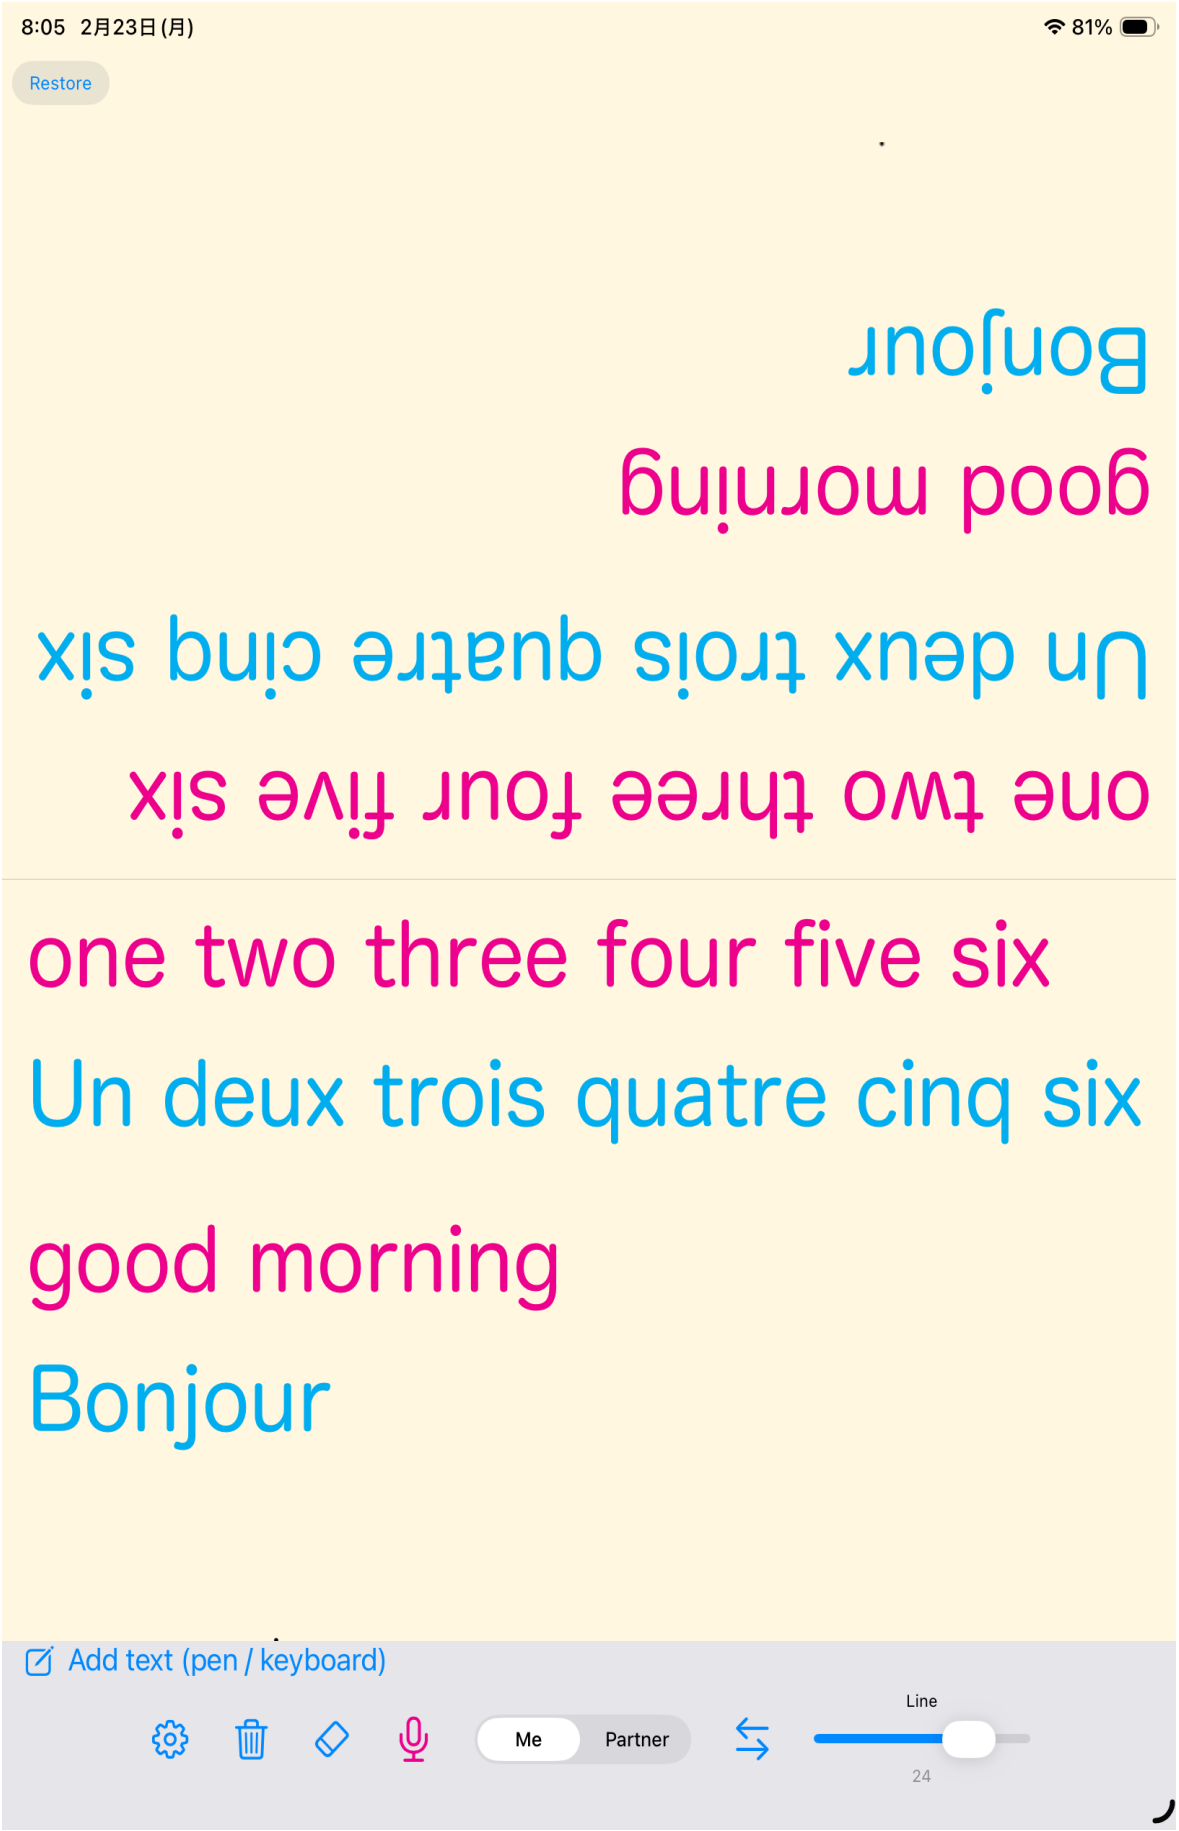
Your words appear on screen
↓
The translation appears
↓
The speaker reads the translation aloud

Translation does not run when both languages are the same. Example: Partner = English / Me = English

4) Translation Example 1

Me: English

Partner: French



me

partner

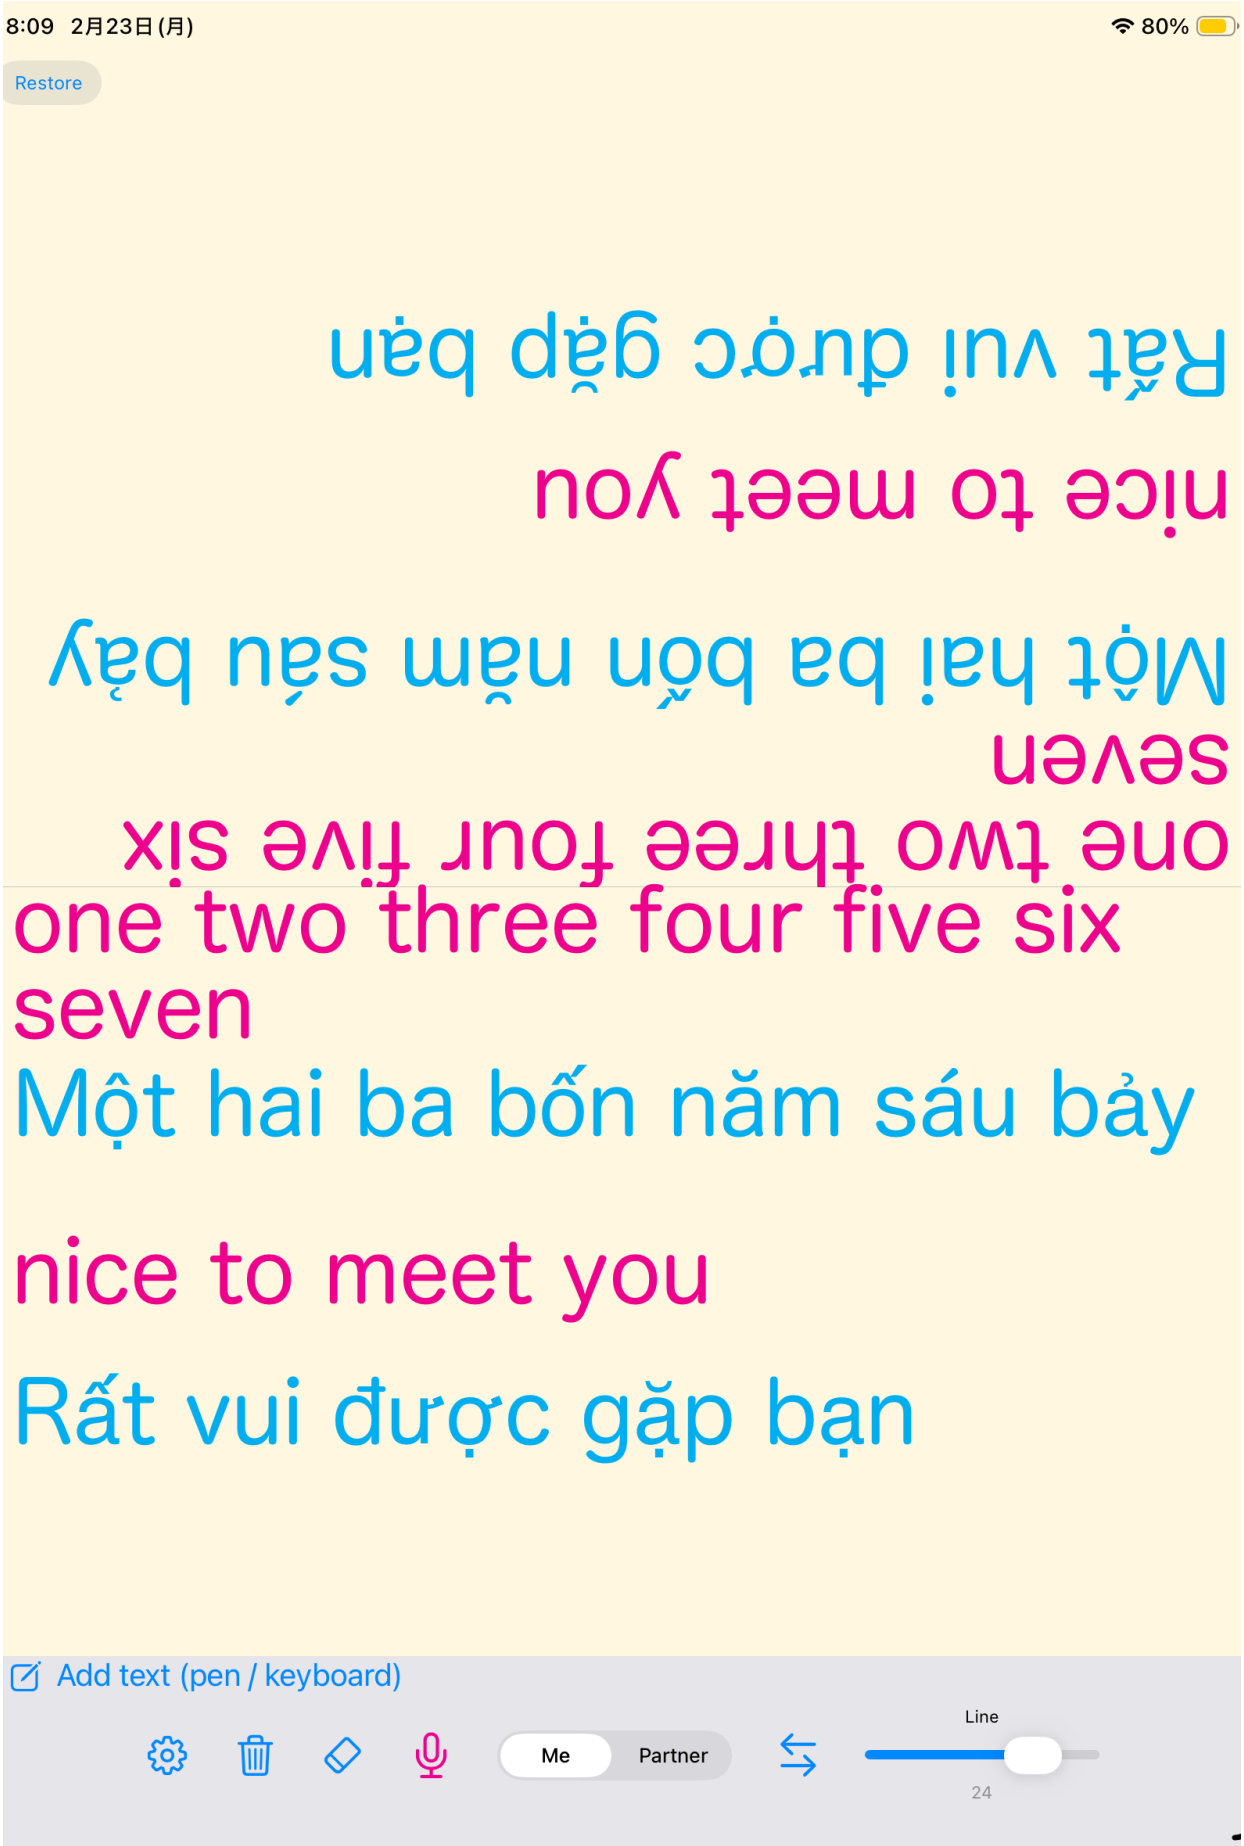
me

partner

5) Translation Example 2

Me: English

Partner: Vietnamese

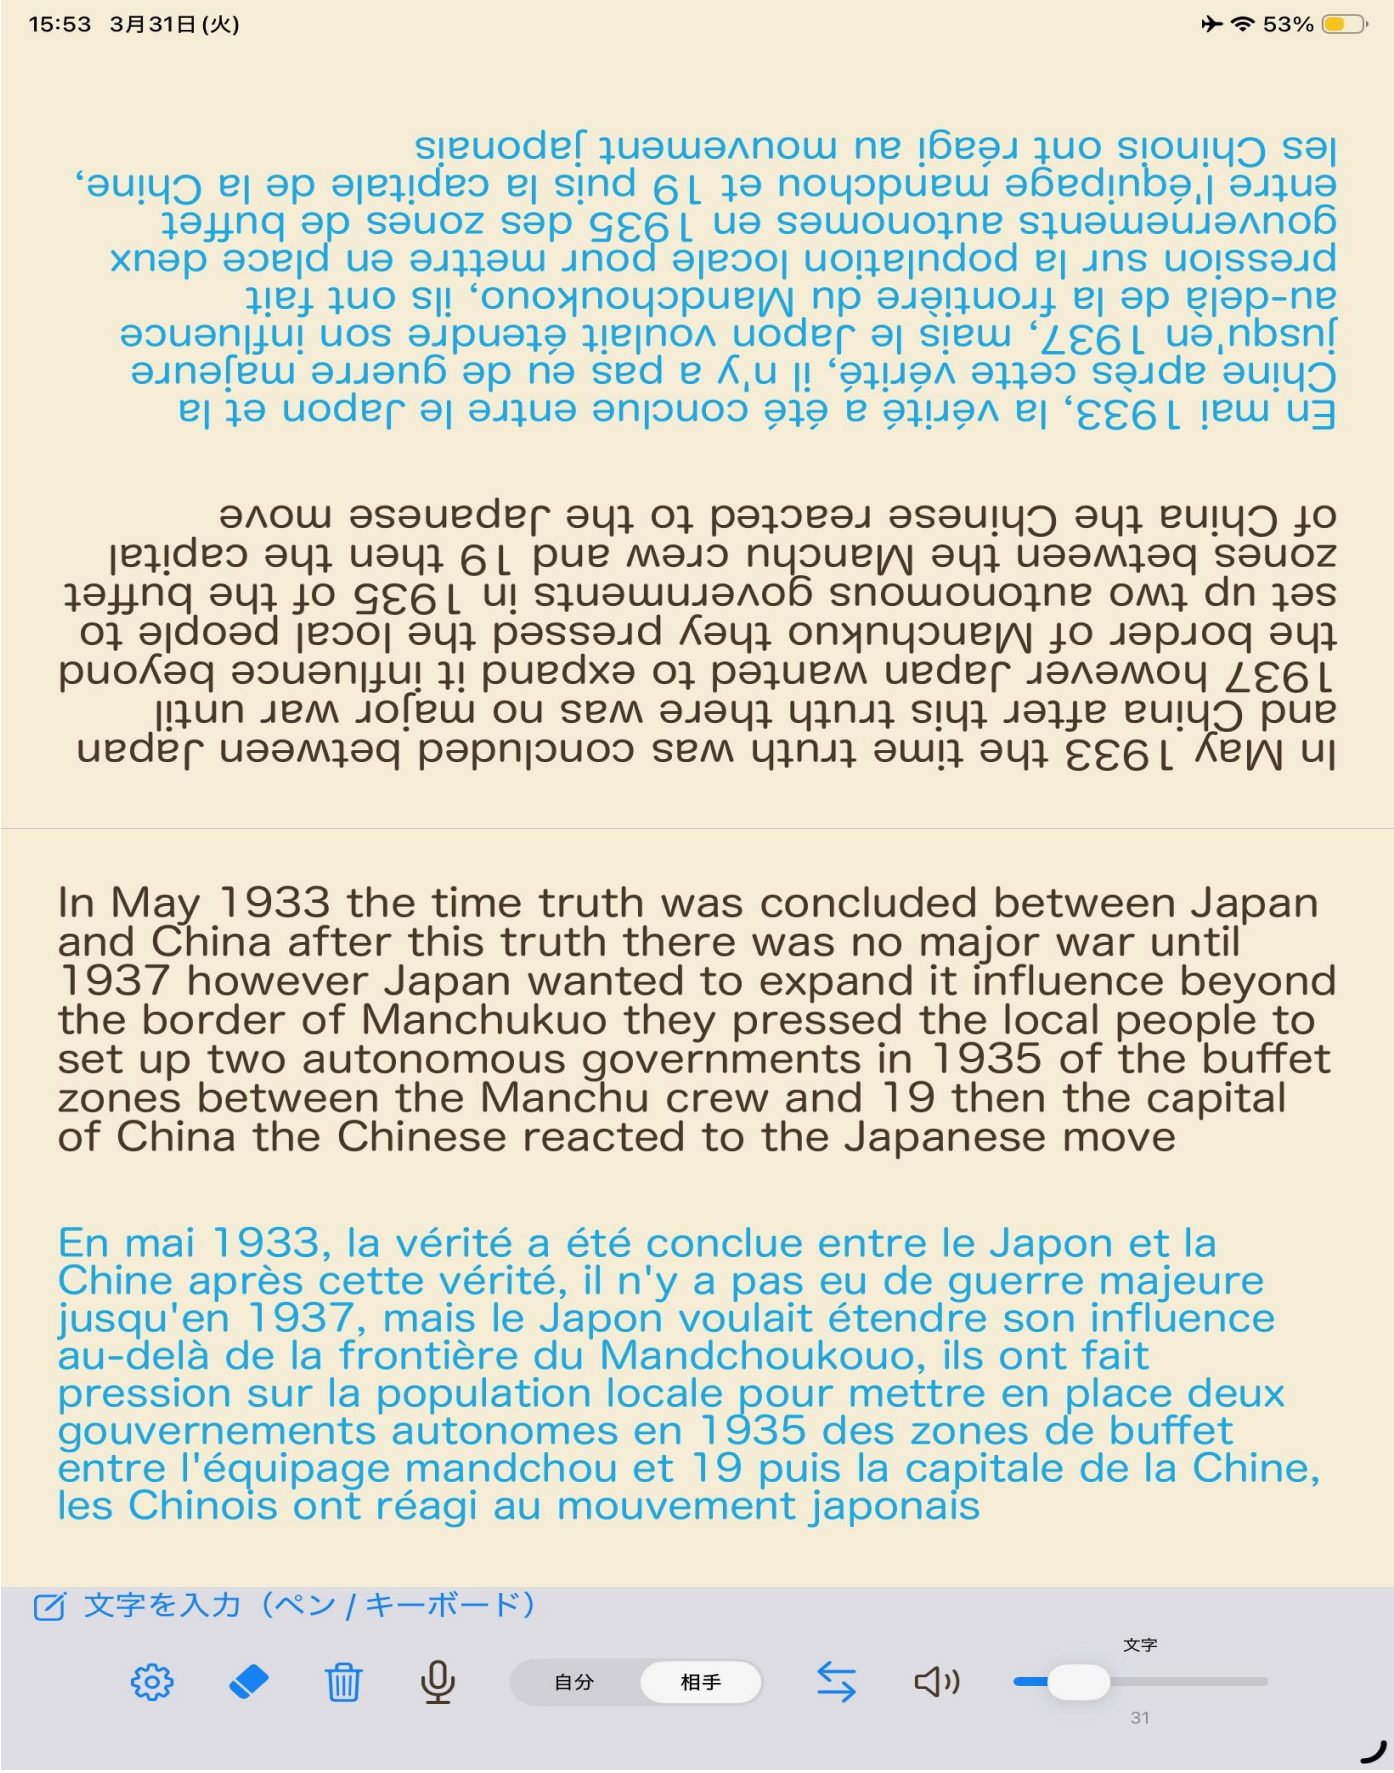


me

Partner

me

partner

6) Translation Example 3


You can translate more words by reducing the font size.
